

MTHOBISI NXUMALO

FULL STACK DEVELOPER

Durban, KwaZulu-Natal, South Africa | 071 927 9462 | mthobisinx30@gmail.com
portfolio.rephinasoftware.com | github.com/mthobisi30 | linkedin.com/in/mthobisi30

SUMMARY

Full Stack Developer with production-grade experience building end-to-end web, mobile, and desktop systems across manufacturing, industrial inspection, e-commerce, and financial-services domains. Owns the full software development lifecycle — requirements and architecture through database design, development, containerised deployment, and long-term support. Proven in delivering multi-surface platforms on a single shared database, both as an employed developer and independently through Rephina Software.

EDUCATION

North-West University <i>BSc Information Technology</i>	<i>Potchefstroom, South Africa</i> 2020 – 2023
• Relevant coursework: Computer Science, Software Engineering, Databases, Networks, and Systems Analysis.	
Apex Academy <i>Short-Term Insurance (NQF Level 4) — Insurance Principles, Risk Management, Compliance</i>	<i>South Africa</i> 2024
King Edward VII School <i>National Senior Certificate (Matric)</i>	<i>Johannesburg, Gauteng</i> 2015 – 2019

PROFESSIONAL EXPERIENCE

Wesant Manufacturing / Vision Elevators <i>Full Stack Developer</i>	<i>Pinetown, KwaZulu-Natal</i> Sep 2025 – Present
- Design, develop, and maintain all internal and external web and mobile applications, owning architecture, delivery, and the full software development lifecycle. - Build web applications with Next.js, React, and TypeScript; cross-platform mobile apps with Flutter / Dart; and native Android in Kotlin. - Serve as primary database administrator for PostgreSQL and Microsoft SQL Server — schema design, query optimisation, indexing, and automated backups. - Implement authentication and role-based access control (JWT / OAuth) across all systems for secure, compliant data access. - Deploy and operate production applications with Docker on self-hosted Coolify infrastructure, maintaining CI/CD pipelines, uptime, and monitoring. - Translate business requirements into technical specifications and shipped features.	
Rephina Software <i>Founder & Full Stack Developer</i>	<i>Durban, KwaZulu-Natal</i> 2023 – Present
- Operate an independent software practice delivering custom web, mobile, and desktop applications, dashboards, APIs, and workflow automation end to end. - Own each engagement from architecture and development through deployment, hosting, and long-term support. - Delivered contract platforms including MPIA Services (industrial NDT inspection) and RedHailer, a service marketplace for Qwezy Digitals.	
Hamtern Financial Services <i>Learner — IT & Systems Support</i>	<i>Bryanston, Gauteng</i> Jan 2024 – Dec 2024
- Built end-to-end workflow automation with Microsoft Power Platform (Power Automate, Power Apps, Power BI), reducing manual administrative effort across departments. - Developed Python scripts for data extraction, transformation, and automated reporting. - Supported IT infrastructure rollouts, user training, and ITSM / enterprise ticketing processes.	

SELECTED PROJECTS

MPIA Services — Industrial NDT Inspection Platform

Rephina Software

Next.js 15 · TypeScript · Flutter · Tauri 2 · PostgreSQL · Prisma · NextAuth

- Architected and built a seven-surface operations platform — admin web and desktop, client portal (web, desktop, mobile), field mobile, and marketing site — over one central PostgreSQL database.
- Engineered offline-first field capture to local SQLite with automatic sync on reconnection, plus Ed25519-signed Tauri desktop installers with auto-updates.
- Implemented tenant-scoped client access, granular permissions, and audit logging across jobs, reports, invoices, and inspection records.

ElevateTech — Manufacturing PIM, Supplier Portal & Commerce

Full Stack Developer

Next.js · React · React Native · TypeScript · PostgreSQL · Prisma · Docker · Coolify

- Delivered four connected surfaces — a Product Information Management system, supplier portal, customer store, and React Native app — over one product database.
- Built versioned product data, bulk CSV import / export, change-history audit trails, role-based dashboards, and automated inventory sync.
- Containerised services on self-hosted Coolify with zero-downtime releases and automated migrations.

RedHailer — Service & Product Marketplace

Contract for Qwezy Digitals

Next.js · TypeScript · PostgreSQL · Prisma · NextAuth · PayStack · Pusher · Capacitor

- Built a full-stack marketplace with client / provider role switching, service listings, and a product catalogue with inventory tracking.
- Integrated PayStack payments with server-side verification, Pusher real-time chat, and QR-code job acceptance / completion workflows.
- Shipped native Android / iOS via Capacitor with OpenStreetMap geocoding and distance-based delivery pricing.

Rephina ERP — Business Operations Platform

Founder / Full Stack Developer

Python · Flask 3 · SQLAlchemy 2 · PostgreSQL · JWT · Alembic

- Built a 70+ table ERP spanning finance (ZAR + 15% VAT invoicing), CRM, projects, time tracking, HR, support, and reporting.
- Secured the system end to end with JWT authentication, role-based access control, ORM-guarded queries, rate limiting, and audit logging.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, C#, Kotlin, C++, SQL

Frontend & Mobile: Next.js, React, Flutter, React Native, Capacitor, Tailwind CSS, shadcn/ui, HTML5, CSS3

Backend: Node.js, Flask, ASP.NET Core, REST API design, MVC architecture

Databases: PostgreSQL, Microsoft SQL Server, Oracle, SQLite, Prisma ORM, SQLAlchemy — schema design, query optimisation, migrations

DevOps & Cloud: Docker, Coolify, AWS, Microsoft Azure, GitHub Actions, CI/CD, Git

Security: Authentication, JWT, OAuth, RBAC, tenant isolation, cyber-security best practices

Automation & AI: Power Automate, Power Apps, Power BI, UiPath, AI agents & models, PyTorch

Practices: Full SDLC, requirements analysis, system architecture, technical documentation, code review, Agile / Scrum

CERTIFICATIONS

- Diploma in Cyber Security — Alison (2024)
- Responsive Web Design — freeCodeCamp (2023)
- JavaScript Algorithms and Data Structures — freeCodeCamp (2023)
